WORDS	TEXT	QUESTIONS
To waste = To throw away = Slice = Still = Bin =	British families **waste** £60 a month on food they don't eat, says a new report. We **throw away** 24 meals a month in the UK, that's 4.2 million tonnes of food and drink every year! The top three foods that British families usually waste are bread, potatoes and milk. We throw away 22 million **slices** of bread, 5.8 million potatoes and 5.9 million litres of milk every day. This food is often **still** good to eat, but it goes into the **bin**.	1. How much do British families waste on food? 2. How many meals do they throw away every month? 3. What are the top three foods that British throw away? 4. Do they throw them away because they have gone bad?
Happen = Label = Past = Too big = To go bad =	Why does this **happen**? 1. A lot of consumers don't understand the **labels** on food. They throw away food because the date on the packet is **past**, but food is usually still good 4 or 5 days after that date. 2. Some consumers say packets of food in supermarkets are too big. For example, bags of salad are **too big** for a family to eat before they **go bad**.	5. Why do people throw so much food?

To sell = Item = Instead of =	3. Supermarkets often **sell** food on 'special offer', so we buy 2 or 3 **items instead of** 1. But we throw away a lot of the extra food we buy on special offer! From *Super 1*, Eli Publishing	

1. **British people waste £ 60 a month, because they throw away food**.
